

Oskar Szrajer

Senior Software Engineer · Ruby / Elixir · AI-enabled web development

hello@gotar.info · +48 608-019-078 · Gdynia, Poland · <https://gotar.info> · <https://linkedin.com/in/oskarszrajer> · <https://github.com/gotar>

Experience

Founder / Owner

Gotar

Apr 2011 – ongoing · Gdynia, Poland / Remote

- Founder and owner of Gotar, a Ruby/Elixir consultancy since 2011, building end-to-end web applications for international clients.
- AI-assisted development: LLM-powered features, prompt engineering, automated engineering workflows.
- Developing a series of own projects and apps, including an advanced AI assistant bot.
- Business consultant for Rebased Software House.

Senior Software Developer

Impactpool

Sep 2021 – ongoing · Remote

- Tech-team lead and senior developer on Impactpool, a Ruby on Rails 8 platform connecting humanitarian employers with qualified talent — job matching, talent pools, analytics, BigQuery and external API integrations.
- Modern Rails stack: Hotwire (Turbo & Stimulus), ViewComponents, Dry-rb, Sequel; Puppeteer-based scraping; building and leading the distributed tech team.

Senior Backend Developer

Belighted

Oct 2018 – Aug 2021 · Remote

- Backends for three products — Hannah Online (financial forecasting), AXS (car sharing), Admeet (GDPR generator) — Rails, Roda/ROM, Dry-rb, RSpec, PostgreSQL, GraphQL, SOAP.

Co-owner & Senior Ruby Developer

Ragnarson

Apr 2011 – Oct 2016 · Sopot, Poland / Remote

- Co-owner: established the Tricity office, grew the company from 10+ to 30+ developers, hired and trained 100+ interns, supported clients as Project Manager and Account Manager.
- Senior Ruby developer on high-traffic backends: Tripsta (>3000 req/s), Getmii (geo-based messaging), MaMyMo (Google Ads platform), Locafox, Masii — Ruby, Roda, JRuby, Sinatra, Redis, ElasticSearch, PostgreSQL.

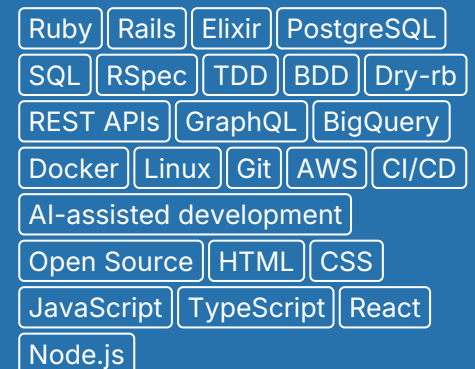

Profile

Backend web application developer specializing in **Ruby and Elixir** with **20+ years** in software engineering, deep Linux/DevOps expertise, and strong **TDD / BDD / Agile** practice — working remotely for most of my career.

AI-aware engineer with an **MSc in Computational Intelligence** and a practical focus on applying AI to reliable web products: LLM-enabled applications — prompt design, structured outputs, API integration, evaluation — and AI-assisted engineering workflows: research, prototyping, code review.

Served as **Senior Ruby Developer**, **Team/Technical Lead** and **Software Engineering Manager**, leading remote teams, mentoring developers, and actively contributing to open source.

Skills

Education

MSc, Computational Intelligence

University of Gdańsk · 2008 – 2010 · AI, machine learning, algorithms

BSc, Computer Science

University of Gdańsk · 2005 – 2008
